

MINH HOANG

Designer

A designer is known for pushing the boundaries of form, material, and texture while balancing innovation, user-experience and technological advancement. As a designer, I love creative problem-solving and using design to improve the quality of experience.

Graphic Designer — UNIVERSITY OF NEBRASKA-LINCOLN

July 2018 - Present

UI/UX designer for web and mobile applications across the University of Nebraska-Lincoln campus. Projects included Love Library's "Big Red Ruckus." Launched in September 2018, the goal of this was to educate first-year students on the many library resources across campus. The UX based on a "gaming" concept. Students were challenged to complete 5 activities for a chance to win prizes while learning about resources. Another project, due to launch in the fall of 2019, is an app-based course schedule system that students could use to explore classes, find classrooms and manage the schedule. This will tie into their MyRed account to allow for managing of class requirements, prerequisites, and registration. In addition, I design traditional printed materials including infographics and posters.

Network Engineer Support — UNIVERSITY OF NEBRASKA-LINCOLN

Jan 2016 - Present

Provides network support for K-12 schools and institutions across Nebraska. Setup and configuring routers and switches. Some experience with setting up firewalls and security.

IT Services Center Associate — UNIVERSITY OF NEBRASKA-LINCOLN

Nov 2014 - Dec 2015

Monitored servers, provided support for the "Network Nebraska" (UNK, UNL, UNO) and partner universities in the state of Nebraska through Solarwinds software solutions. Responsible for generating I-support tickets, handling job errors, and managing all printers throughout the system.
